The Society of Underwater Technology (SUT) proudly invites you to the latest learning event of the KL branch.

SUT is a multi-disciplinary learned Society bringing together individuals and organizations from more than 40 countries that have a common interest in underwater technology, ocean science and offshore engineering. The SUT was founded in 1966 and includes engineers, scientists, other professionals, and students.

The SUT has established branches in Aberdeen, Houston, Rio de Janeiro, Perth and Melbourne. In recognition of the increased subsea activity in the South East Asian region a local committee was formed on 21st April 2008 with the view to establishing a permanent presence of the SUT in Kuala Lumpur. We welcome you to enjoy lively presentations from our guest speakers on the subsea developments within our region.
