

Western Australian Museum Presents

immerse

UNDERWATER TECHNOLOGY

The Western Australian Museum
in association with the
Society for Underwater Technology
is proud to announce Australia's first
underwater technology exhibition *Immerse*.

Western Australian Museum –
Maritime, Victoria Quay

2 September 2011 - 2 March 2012

immerse

UNDERWATER TECHNOLOGY

Immerse will plunge the visitor into an alien environment and experience what it's like to explore and work below the ocean.

Immerse will focus on technological innovations, illustrating the challenges, ingenuity and opportunities the underwater industry brings to the broader community. It aims to inspire young people to explore technical, subsea and marine related subjects as future careers by showcasing the offshore industry and research organisations in Western Australia.

The WA Museum welcomes partners to support this innovative exhibition which showcases the challenges and opportunities that the subsea industry brings.
